Target moments
initially the DAGs consistent with the PDAG
matching identified
Source moments and valid PDAG
Surviving candidate models C
Optimal actions $A_B(H)$ of each $H \in C$
Shared optimal action?
yes
Return it
Section 5, Prop. 5.1
Def. 7.1
no
Full recovery (Alg. 1) stops only when $|C| = 1$
Response reveals v's mechanism; keep the candidates consistent with it
Query one node v (minimax or one-step rule)
Thm. 6.1
Thm. 7.2, Alg. 2
